Mandir Das

Flutter Developer · AWS Cloud · AI-Integrated Applications
+91 9800987956 · dasmandir0@gmail.com · Siliguri, WB · GitHub · LinkedIn

SUMMARY

Flutter developer with production deployments on the Google Play Store and Apple App Store. Specialises in BLoC architecture, Firebase integration, and AWS cloud infrastructure (EC2, Fargate, ECS, S3, Lambda, RDS). Built and shipped an AI-powered chatbot using AWS Bedrock / Nova Pro that cut support queries by ~25%. Advocates clean architecture, SOLID principles, and WCAG accessibility. Comfortable across the full mobile-to-cloud stack.

TECHNICAL SKILLS

Mobile: Flutter · Dart · Android (Play Store) · iOS (App Store) · Xcode · App Store Connect
State management: BLoC (primary) · GetX · Provider · Riverpod
Backend & APIs: RESTful APIs · Django · Flask · Firebase (Auth, Firestore, Storage, Push)
AWS Cloud: EC2 · Fargate · ECS · ECR · S3 · Lambda · SES · RDS · Route 53 · Bedrock
AI / ML: AWS Nova & Nova Pro · Gemini AI · TensorFlow · CNN
DevOps & CI/CD: Docker · GitHub Actions · Nginx · Render · Linux
Testing: Flutter unit · widget · integration testing
Accessibility: WCAG contrast · VoiceOver (iOS) · TalkBack (Android)
Languages: Dart · Python · Java · C++
Databases: Firebase Firestore · PostgreSQL · DynamoDB · AWS RDS

EXPERIENCE

Software Engineer — Flutter & Cloud — Badi Bahen
Siliguri, India | Aug 2025 – Present

- Shipped production Flutter app to Google Play Store and Apple App Store, driving a 30% increase in user engagement within 3 months of launch.
- Managed end-to-end iOS deployment — Xcode configuration, provisioning profiles, certificates, and App Store Connect submission — achieving first-attempt App Store approval.
- Integrated AWS Nova & Nova Pro (AWS Bedrock) to build a context-aware AI chatbot, reducing customer support queries by ~25%.
- Migrated cloud infrastructure from AWS Fargate to EC2, right-sizing services and cutting monthly infrastructure spend by ~20%.
- Architected Flutter apps with BLoC and clean architecture (SOLID principles), reducing feature development time by 30%.
- Built accessible UIs following WCAG contrast guidelines with full VoiceOver and TalkBack screen-reader support, expanding reach to users with accessibility needs.
- Implemented CI/CD pipelines with GitHub Actions, Docker, and Nginx — eliminating manual deployments and achieving zero-downtime releases (~60% time saving).
- Managed full AWS stack: ECS, ECR, S3, Lambda, SES, RDS, and Route 53 for cloud-connected mobile features.

Software Engineering Intern — Miracuves Solutions Pvt. Ltd.
Maharashtra, India (Remote) | Mar 2025 – Jun 2025

- Developed and deployed cross-platform Flutter apps for Android and iOS using BLoC architecture, delivering 3 major feature rollouts within a single sprint cycle.
- Integrated third-party REST APIs and optimised Firebase Firestore queries, cutting data-fetch latency by ~35% through targeted widget rebuild reduction.
- Built responsive, accessible UIs tested across 5+ device sizes on both Android and iOS.

DevOps & Full Stack Intern — Cosyguma Info
Uttar Pradesh, India (Remote) | Nov 2024 – Jan 2025

- Deployed Flutter and Django applications on AWS EC2 with Nginx, sustaining 99.5% uptime across a 2-month production window.

- Configured AWS S3, RDS, and Route 53; integrated Razorpay payment gateway with zero transaction failures in testing.
- Automated build and deployment workflows using GitHub Actions CI/CD and Docker, reducing manual deployment time by ~60%.

PROJECTS

Disease Recognition App · *Flutter · Flask · Gemini AI · TensorFlow · Firebase* github.com/MandirDas

- Deployed ML-powered Flutter app to Android (Play Store) and iOS (App Store) for farmers to diagnose crop and livestock diseases in the field.
- Trained TensorFlow CNN models achieving 96% accuracy for crop diseases and 80% for livestock diseases.
- Integrated Gemini AI API for real-time treatment suggestions; Flask backend on Render handles 200+ concurrent requests.
- Implemented Firebase Auth, Firestore data sync, and push notifications with full unit, widget, and integration test coverage.

Speech Emotion Detection · *Python · TensorFlow · CNN · MFCC* github.com/MandirDas

- Built CNN model achieving 86% accuracy for real-time emotion classification from speech using MFCC feature extraction.
- Reduced inference latency by ~40% through algorithmic optimisation (DSA), enabling real-time processing on low-resource hardware.

EDUCATION

B.Tech in Computer Science & Engineering *Graduated: Jul 2025*

Siliguri Institute of Technology, MAKAUT University · **CGPA: 8.1 / 10**

ACHIEVEMENTS & LEADERSHIP

- Frontend Member — Google Developer Student Clubs (GDSC), SIT Chapter
- Student Coordinator — Technovision 2024, Annual Tech Fest
- Technical Head & Volunteer — NEEV NGO
- Winner — Gaming Competition, Annual Tech Fest 2022 | 4th Place — Robotics Competition, SIT
- Participant — Smart India Hackathon (Internal Round)
